

5th August, 2024

To whom it may concern

This is to certify that, **Tiyasha Kundu**, who completed her 3rd year of study of BTech in CSE at KIIT, worked for a summer internship during 2024 summer under my supervision in the Natural Language Processing (NLP) Research Lab in the Computer Science & Engineering Department at Jadavpur University. She worked on **Natural Language Interface to Database** during the internship. The objective of the work was to design a system that can translate Natural Language Queries to SQL Queries so that general people without any knowledge of SQL can access and retrieve information from Database using Natural Language queries.

She took keen interest in the topic and worked diligently on the project. She carried out significant amount of work given her almost no previous exposure to NLP. I am satisfied and happy with her performance and wish her all success in life.

Should you have any further questions, please do not hesitate to contact me. I will be delighted to furnish you with more information, should this be required.
